Ayan Sarkar

Full-Stack Developer · Product Builder · Founder

ayansarkarr6@gmail.com · linkedin.com/in/ayansarkarrr · x.com/yeaayan · uniqou.in

SUMMARY

Full-stack developer and solo founder who shipped **Uniqou** — a real, live product — from zero to users, handling engineering, product, and growth end-to-end. Builds fast using AI-assisted development. Comfortable with ambiguity; focused on outcomes over tools.

EXPERIENCE

Founder & Developer — Uniqou

2026 – Present · uniqou.in

- Accomplished a production-ready student networking platform, measured by [X] signups post-launch, by architecting a full-stack web application with real-time messaging, mutual connection graphs, and user authentication — solo, from first commit to live product.
- Accomplished real-time message delivery at scale by designing a normalised relational database schema with optimised queries and efficient state management, powered by real-time infrastructure.
- Accomplished [X]% month-on-month Instagram growth for the platform with zero ad spend, by executing a short-form video and graphic content strategy — same approach used to grow a personal art account to 8,000+ followers.

Freelance Web Developer

2026 – Present

- Accomplished end-to-end delivery of [X] client projects — including e-commerce stores, course platforms, and business sites — by owning design, development, and cloud deployment as a one-person team.
- Reduced project turnaround time significantly by integrating AI development tools into the workflow without compromising code quality or client satisfaction.

Partner — AI Film & Video Agency

2026 – Present

- Co-run a client-facing agency producing AI-generated video content; responsible for creative direction, production pipeline, and delivery.

EDUCATION

Jalpaiguri Government Engineering College (JGEC)

B.Tech, Mechanical Engineering · 2024 – 2026 · Left voluntarily to found and build Uniqou full-time

Margreat (S.N.) English School

Class 12, Science (PCMB) · 2024

SKILLS

Frontend: Interactive web UIs, responsive design, component-based architecture, modern JavaScript

Backend & Data: Real-time databases, relational data modeling, REST API integration, user authentication systems

Deployment: Cloud deployment, automated release pipelines, version control workflows

Product: MVP scoping, user research, product-led growth, full-stack product ownership

AI & Prototyping: Rapid prototyping with AI tools, AI image and video generation, working with large language models

Design: Interface design, wireframing, responsive UI/UX

Learning: Python, 3D web graphics, TypeScript

LANGUAGES

English, Hindi, Bengali
